common ground

cg360° Inventory

All of your assets, in one place.

Know what you run. Know where it lives.

All of your assets, in one place: repositories, domains, sites and feeds, and what each one is for. Search it or open a list, and see where every number comes from.

REPOSITORIES

The code and what each repository is for.

DOMAINS AND SITES

Domains, websites and wikis in one list.

FEEDS

What each feed reads and where it shows.

The average company now runs 101 apps, Okta's Businesses at Work 2025 found. Repositories, domains, sites and feeds come on top of that.

WHAT YOU ACTUALLY GET	Backstage	Port	Inventory
Repositories and what each one is for	◐	●	●
Websites in the same list	●	◑	●
Domains and what each one serves	○	◑	●
What each feed reads, how often, where it shows	○	◑	●
Set up for you, ready to use	○	◑	●

Inventory is one searchable list of everything your business runs. Each repository says what it is for, each domain says what it serves, and each feed says what it reads, how often and where it shows. When someone asks where something lives, the answer is already written down.

IN ONE LIST

Repositories, domains, sites and feeds.

See yours

WALKTHROUGH

Your repositories, domains, sites and feeds, listed and searchable.

Set it up

SETUP

Pointed at the accounts you already run, with each asset named and described.

Keep it current

ONGOING

New assets and feeds added as the business changes.

See all of your assets, in one place.
